Glass Door Insert Manufacturer

Highlight Series
Ultra Low Energy Insert

Maslen Australia has invested several years in intense research and development to produce this breakthrough world class, low energy glass door insert. The high tech non-heated doors with anti fog coat inside and heat reflective coat outside, warm edge spacer with argon filled cavity and patented insulated light covers together with a plethora of other improvements have produced a true low energy high performance product that will present and preserve your stock in the best possible way while minimizing the costs involved.

Standard Features:

- Thermally broken aluminium inserts and door frames provide the strength, durability and good looks of aluminium with the energy efficiency of plastics.
- Sealed glass unit with ALL toughened safety glass, warm edge technology, argon filled, heat reflective glass, anti fog coat inside.
- Hold open arm with auto safety release for easy stocking.
- Reversible door hinging, easily changed to left or right hand swing.
- Full height vertical lights both sides of each door with insulated tough Polycarbonate covers (patented), provide premium light, even in freezers. All lighting components can be serviced without moving any stock.
- Team with our four post or cantilever shelving and merchandising accessories.

Options:

- Powdercoating to your choice of colour.
- Horizontal lighting, top and bottom.
- Low level heating with intelligent control for non air conditioned stores. ie: above +25°C and 60% relative humidity.
